

SAURABH KUMAR GAUR

AI/ML Engineer and Full-Stack Software Developer

saurabhgaur122000@gmail.com | Rudrapur, Uttarakhand, India (Open to Remote / Global Relocation) | saurabhgaur.world | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI/ML Engineer and Full-Stack Developer with 1+ year evaluating frontier LLMs (GPT-4, Claude, Gemini) for RLHF alignment at Scale AI, and a proven record of designing, building, and deploying 6+ production web and AI platforms. Expert in multi-agent orchestration (LangGraph), hybrid RAG architectures, LLM evaluation benchmarks, and full-stack systems (Python/FastAPI, TypeScript/Next.js, Supabase/PostgreSQL). Microsoft Certified (AZ-400 DevOps Engineer and AI Product Manager). Strong proponent of async engineering, autonomous execution, and shipping high-performance, resilient software.

TECHNICAL SKILLS

AI and LLM Systems	LangGraph, LangChain, RAG Systems, Multi-Agent Workflows, RLHF Alignment, LLM Evaluation, Prompt Engineering, Gemini API, OpenAI API
Languages	Python, TypeScript, JavaScript, SQL, HTML5, CSS3
Backend and APIs	FastAPI, Node.js, Express, RESTful APIs, Serverless Functions (Vercel, Railway), Webhooks, Rate Limiting
Frontend	React, Next.js 14 (App Router, RSC), TanStack Start (SSR), Tailwind CSS, Radix UI, Responsive UI
Databases and Vectors	Supabase (PostgreSQL, Row-Level Security, Storage), ChromaDB, FAISS, Pinecone
DevOps and Tools	Git, GitHub Actions (CI/CD), Docker, Azure DevOps (AZ-400 Certified), Vercel, Railway, Razorpay API, Linux/Bash

PROFESSIONAL EXPERIENCE

Independent AI Product Developer

Apr 2026 - Present

Self-Employed | Remote (India)

- Architected, built, and launched 6+ live full-stack and AI applications end-to-end, managing entire lifecycles from system design and API engineering to deployment and payment integration (Razorpay UPI/Cards).
- Engineered multi-agent resume analysis and rewriting SaaS (HireOS) using LangGraph and Gemini 2.0 Flash, cutting per-request processing latency to under 15 seconds via structured output validation and TTL caching.
- Designed and deployed an e-commerce art platform and portfolio (saurabhgaur.world) using Next.js 14 App Router, Supabase Auth, PostgreSQL RLS, and HMAC-verified webhook fulfillment with time-limited download tokens.
- Implemented a production RAG knowledge engine (RAGForge) featuring hybrid BM25 and dense vector retrieval, query expansion, reciprocal rank fusion, and a lightweight hallucination guard.
- Built automated utility billing software (MakaanBook) with complex split-meter calculations, PDF report compilation, and conversational Hinglish querying powered by Gemini 1.5 Flash.

AI / LLM Evaluator - Frontier Models

May 2025 - May 2026

Scale AI | Remote

- Evaluated, scored, and red-teamed frontier LLM outputs (GPT-4, Claude 3.5, Gemini) across complex programming, algorithm design, and multi-step reasoning tasks for RLHF training pipelines over 1+ year.
- Formulated reproducible benchmarking rubrics across 5 key dimensions: instruction following, multi-source knowledge synthesis, safety boundary enforcement, logical coherence, and context persistence.
- Authored failure taxonomies identifying hallucination patterns, reasoning drift, and edge-case safety violations, directly shaping data curation guidelines for subsequent model alignment rounds.
- Constructed synthetic multi-server evaluation datasets (OpenClaw Atlas) with conflicting information nodes to measure cross-document reasoning and contradiction resolution in agentic models.

KEY PROJECTS

HireOS - AI Resume Intelligence and Rewriting Platform hire-os-langgraph.vercel.app

Python, FastAPI, LangGraph, Google Gemini 2.0 Flash, Razorpay, Vercel, Railway

- Production multi-agent pipeline: Extraction Agent parses role requirements, Analysis Agent identifies skill gaps, and Rewrite Agent generates ATS-tailored resume bullets with keyword alignment.
- Engineered security and reliability features including per-IP rate limiting, SHA-256 admin bypass, strict input validation, and in-memory TTL caching supporting 500 concurrent users.
- Integrated seamless monetization with Razorpay payment webhooks for instant unlock of advanced resume rewriting and interview preparation modules.

RAGForge - Production Multi-Document RAG Knowledge Engine github.com/DEVsaurabhgaur/ragforge

Python, LangChain, ChromaDB, Streamlit, HuggingFace Embeddings, Docker

- High-accuracy RAG engine integrating hybrid BM25 and ChromaDB vector retrieval via LangChain EnsembleRetriever, keyword-overlap reranking, and source citation with exact page mapping.
- Includes multi-turn conversational memory, token usage and cost telemetry, persistent session saving, and Dockerized deployment workflows.

MakaanBook - Smart Rental and Utility Billing Management System makaan-book.vercel.app

TypeScript, TanStack Start (React SSR), Supabase (PostgreSQL), Gemini 1.5 Flash, Tailwind CSS

- Full-stack property management suite with fault-tolerant mid-month meter replacement algorithms, dynamic PDF ledger generation, and conversational natural-language queries via Gemini.
- Implemented encrypted document uploads using Supabase Storage buckets and granular PostgreSQL Row-Level Security policies.

KundaliAI - Vedic Astrology Calculation and AI Interpretation Engine kundaliai.vercel.app

TypeScript, TanStack Start, Google Gemini AI, Supabase, Vercel

- Interactive web platform performing precise astronomical coordinate calculations to render Vedic birth charts paired with AI-driven narrative readings.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science and Engineering Graduated 2025

Dr. A.P.J. Abdul Kalam Technical University (AKTU), Uttar Pradesh, India

CERTIFICATIONS

- Microsoft Certified: Designing and Implementing DevOps Solutions (AZ-400) - Microsoft / PearsonVue
- Microsoft AI Product Manager Professional Certificate - Microsoft x Coursera
- GitHub Copilot Fundamentals - GitHub x Microsoft Learn
- GPU Optimization for LLM Inference - AMD AI Academy
- AI Fundamentals - Google x Coursera
- AI for Content Creation and Writing - Google
- Microsoft AI Skills Fest 2026 - Microsoft

ADDITIONAL HIGHLIGHTS

- Open Source and Community: 13+ public repositories on GitHub with over 13,000 lifetime commits and consistent daily contribution streaks.
- VS Code Marketplace: Author and maintainer of Infinite Void Theme, a curated high-contrast dark theme for developers.
- AI Artistry and Creative Systems: Creator of a 200+ piece collection combining generative models (Stable Diffusion, Midjourney, ComfyUI) and traditional artwork.
- Work Authorization: Indian Citizen, available for 100% remote global contracts, India-entity payroll, or relocation.
